SUMMARY

Software engineer experienced in building full-stack web apps, cloud monitoring tools, and automation at a Robots-as-a-Service startup, plus a self-built fintech platform with 300+ monthly active users. Skilled in Python, JavaScript/TypeScript, React, Node.js, and AWS.

EDUCATION

Princeton University | B.S.E. in Computer Science 2026

EXPERIENCE

Full Stack Application Developer, Cloud RaaS Monitoring Tools **Sep 2024 – Aug 2025**
Ava Robotics Inc, Cambridge, MA

- Led full-stack development, UX design, and AWS cloud deployment of the Ava RMS Administrative Dashboard, used to monitor and manage hundreds of robots and 32+ Robot Management Servers (RMSs) across 4 continents.
- Implemented authentication, role-based access control with privilege escalation and revocation, email notifications, remote server maintenance, software updates, and real-time fleet visibility using JavaScript, React.js, Express.js, and AWS.

Software Development Intern, Internal Tools **Sep 2023 – Sep 2024**
Ava Robotics Inc, Cambridge, MA

- Automated delivery of 40,000+ reports, events, and logs per quarter to configurable drives, emails, and datasets with 100% accuracy, cutting manual work for a lean team.
- Wrote a script to audit web app and OS versions across RMSs and trigger cross-server software updates in seconds, replacing 4+ hours of manual work each week.
- Automated SSL certificate testing and expiration notifications on AWS, eliminating 8–10 hours of idle time every quarter.

PROJECTS

VAULT | *Peer-to-Peer Lending Platform*

- Built and launched a peer-to-peer lending platform with user profiles, authentication, dashboards, NoSQL transactions, and Stripe API payments using TypeScript, Next.js, and Vercel.
- Grew the platform to 300+ monthly active users, measured with Vercel and Google Cloud Platform analytics.

StreetLevel | *Market Research & Analytics Platform*

- Building a market analytics web app in Next.js, React, TypeScript, and Tailwind CSS with overview, analytics, rule-based signals, and portfolio performance workspaces.
- Implemented technical and risk analytics on historical price data, including SMA, RSI, volatility, drawdown, z-scores, beta, Sharpe and Sortino ratios, and Value at Risk.
- Designing an Express/Node.js REST API backed by MySQL for historical OHLCV data and Firestore for live quotes, with scheduled data ingestion on AWS Lambda and EventBridge.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C
Frameworks: React.js, Next.js, Node.js, Express.js, Flask, Django
Cloud & Infrastructure: AWS, Google Cloud Platform, Google Firebase, Vercel, Docker, Kubernetes
Databases: MySQL, Google Firestore (NoSQL)
Tools & Practices: Git, GitHub, Postman, REST APIs, Stripe API, Agile, Scrum

LEADERSHIP

Vice President | *Debate Club*

- Trained and mentored new members of the 10-member club in debate and public speaking.
- Organized club events and managed the club treasury and event logistics.
